

**EFFORTLESS EASE OF USE**

**MINIMIZE THE WORK.  
MAXIMIZE THE RESULTS.**

**INFINITY® sprinklers make it easy.**

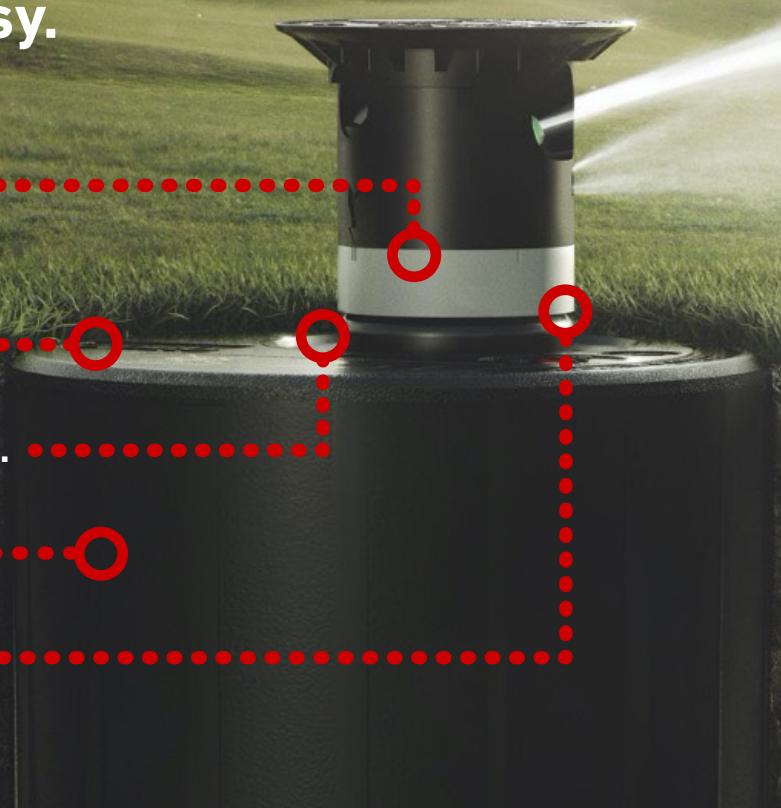

Top serviceable—for instant access to all sprinkler components.

No digging, ever. No turf scars, period.

Pilot valve removable—even with the water on.

No buried wire splices or ground faults.

Nozzle base clutching for hot spot watering.

**Toro INFINITY Series Sprinkler.**

Top selling sprinkler sold since its release in 2014.

**LESS TIME ON  
SPRINKLER MAINTENANCE**

**TIME SAVINGS  
FOR CREW**

**MORE TIME TO TACKLE  
YOUR OTHER CHALLENGES**

**SMART  
HUBS & MODULES**

Manage watering programs from hubs if connection to central control is interrupted.

Make firmware updates to smart modules without digging.

**You want control? You got it.  
Lynx® Central Control.**

All the information you need on one screen.

Optimize watering from the office or course using a mobile device.

Intuitive / familiar Windows®-based layout.\*

Interactive course map shows system activity.

Connect with Lynx Smart Hubs and Smart Modules for extra control.

\*Windows is a registered trademark of Microsoft Corporation in the U.S. and other countries.

**What customers are saying about their new Lynx upgrade.**

“It’s much faster, and much more accurate. I love the speed at which it tests now. All of the electrical information really helps with the troubleshooting.”

- Keith Kresina, Director of Grounds, The Golf Club in New Albany, Ohio

We run a course report in the morning and find out if there are any issues. I don’t have to stress as much as I did before. I come in in the morning, run the report and know what’s going on better than I did before. The new features like the status report and the clicking options for filtering, that’s a lot better. The percent adjust feature is really helpful.

- Stephen Coyne, Golf Course Superintendent, Club Mediterra in Naples, Florida
