INTRODUCING THE ALL-NEW CLUB CAR CURRENT

Compact, versatile, electric. It's a job-doer.

The all-new Current, available in Current and Current LSV models, is like a truck—but better. It features enhanced maneuverability, new/enhanced specially designed automotive body panels for increased durability, and an optional GPS locator with geofencing capability. Available in three different configurations.

PERFORMANCE THAT'S UNBEATABLE

The new Current and Current LSV are the ideal all-purpose vehicles for your campus.

The Current fills the gap between full-sized trucks and smaller utility vehicles. Its all-electric design features the latest technology for power, comfort, and safety – giving you the durability of a pickup truck with the sleek design and efficiency of a utility vehicle.

The Current and Current LSV footprint is smaller than a traditional truck, allowing you to get around campus with flexibility and adaptability that a van or full-sized vehicle doesn't offer.

DESIGNED TO DO THE WORK

With a 13.4 HP electric motor and payload capacity up to 1,246 lbs., both the Current and Current LSV handle any job with ease while helping your campus meet its zero-emissions goals for transportation.

- Standard backup camera
- New updated dashboard, displaying vehicle health
- In-car radio and connectivity
- GPS navigation and locator
- Increased payload capacity
- Power-assist steering
